What the Horoscope and Planets signifie,  
being in the terms of the Planets, &c.

Saturn.	Jupiter.	Mars.	Venus.	Mercury.
Old, slow, reserved, angry, suspicious, and malicious.	Wise, prudent, courteous, and polite, generous, merciful.	Hot and active, but mutable and apt to anger.	Dearest, pleasant, loving, kind, willing to do good.	Men of Office, Orators, settled in Schools, favourers of the learned.
Somewhat temperate, yet envious, fly what is counsel, proud.	Magnanimous, honourable, beautiful and long lived.	Subtle, crafty, and apt to deceit, retaining anger.	Loved by great men, prosperous, honourable, but dissension in wedlock.	Famous men, great adventures, and counsellors in learning.
Silly, idle, proud and vain men, sometimes deformed.	Fortunate, good constitution, free from enemies, rich.	An excellent wit, & good confidence, doing good to himself.	Pleasant and delightful, active, honest, yet game some.	Ingenuous, popular, great Merchants, Travellers, Hypocritical.
Dies an ill death morose, few relations, seldom having issue.	Perfidious, hypocrites, faith breakers, ungodly, and beggarly.	Morose, dogged, & of ill conversation, ungodly.	Single life, women haters, given to unlawful loves, mutable.	Blame of special persons, poisonous, dangerous counsellors.
Sordid men, but seeming religious, covetous, negligent.	Happy life, great friends, wife, and worthy men.	Ingenuous men doing good to others, happy in counsel.	Luxurious, pleasant, but good humoured, and merciful.	Skilful in Law or Physick, but lascivious, generally do well in affairs.
Malignant, cruel, wicked persons, but apt to be discovered.	Very witty and ingenious men, bold, valiant, fortunate in war.	Unfortunate, furious, irreligious, given to all wickedness.	Sudden troubles, given to painting for women, musical.	Wicked, malicious, contentious, rash persons, impudent, irrational.
Covetous of other mens goods, sordidly lascivious, faithless.	Persons of trust and fidelity, good marriage, beloved.	Propense to lust, and as libidinous houses, fraudulent.	Pleasant, affable, lover of music, and love toys.	Happy men, ingenious, beloved of all sorts, famous in wit.
Wicked men, apt to be imprisoned for their misdeeds.	Good manners, and excellent behaviour free from malice.	Treacher, homicidas, falsest, drunken, & lascivious.	Prudent, yet libidinous, good speech, and artists in music.	Men of Learning, lovers of Arts, and famous by them, &c.

*If wanting Wings we may Ascend the Skies,  
 And Phoenix rise, as Phoenix was buried  
 Then Rise up (Mule) from thy Lethargick Brains,  
 And (having first invoc'd the God of Brains)  
 Let the Grand Subject of thy Measures be,  
 No Soul to England like a MONARCHY.*

These Loyal Verses over the Tops of each Month, were formerly  
 Written by the Learned Sir George Wharton Baronet, and signed  
 with his own Royal Plotting Age.

As Old as that Paternal Sovereignty,  
 God plac'd in Adam, full Able People by  
 Disown'd by none but them whose minds are hire,  
 And Envy One should have what All desire,  
 For let a few, or many, we live under,  
 Such shall repine still, whilst not of the Number.

The Antients did a Monarchy prefer,  
 made all their Gods subild to Jupiter  
 And (when Affairs and Nations first began)  
 Princes decrees were th' only Laws of Man:  
 Experience will avow it where there's any,  
 One honest Man is sooner found then many.

Treason, nor Force, so suddenly divides  
 The united strength that in a Crown resides:  
 Sedition prospers on, it seldom here  
 Results an object of the Princes fear.  
 Then when an Empire, Rome was ne're so strong,  
 Nor Triumph'd under other Rule so long.

A Monarchy abhors their Peers with fits  
 Of Emulation. A Free State hegets  
 A Prince cannot in Reins so quickly slack,  
 Or throw his Bur then on anothers back.  
 But where so many Rulers have Command  
 The work is Transfer'd and Toss'd from Hand to Hand.

The People, or the Nobles, to debate  
 The deep concernments of a Troubled State,  
 Set Times and Places have assign'd them: They  
 First Meet, and then adjourn from Day to Day,  
 Whereas a Monarch, who by nature's One,  
 Deliberates always, never's off his Throne.

# An Astrologo-Physicial Discourse.

That the pre-dominion of humors, is the immediate cause of diseases; and that the excitation of these humors, is caused by the various and different Aspects and Positions of the Stars is even by Hippocrates and Galen themselves confirmed. Trust we then to these Rules Astrological, to be observed for the advantage for the sick;

Let the	{	Sanguine	} bleed the	{	♂, or ♀.
		Cholerick			♂, or ♀.
		Phlegmatick			♂, or ♀.
		Melancholy			♂, ♀, or ♀.

But let her be also in the Aspect of the Fortunate Planets, and seated in a fortunate part of Heaven.

It is good to purge with Electuaries, when the ☾ is in ♈; with Pills, when she is in ♋; with Potions, when in ♎, because then posited as before directed.

Vomits are unsafe for all sorts of complexions and constitutions; yet sometimes there is a necessity for them; as when the Distemper lyeth above the stomach; it being impossible for a Purge, or any purgative Medicine thence to carry it; but when there is an occasion they may be safely taken when the ☾ is in ♈, ♎, or ♋ in any good Aspect of ☉, ☿, or ☽.

Oysters are most conveniently administered, when the ☾ is in ♏, ♐, or ♑, posited as before.

Good to stop Fluxes, or Rheumes, or Issues, when the ☾ is in any of the Earthly Signs, viz. ♋, ♎, or ♏; of which experience is a valuable witness.

Very proper to Bath, when the ☾ is in ♈, ♐, ♑, or ♋, in Aspect of ☉, or ♃.

Convenient to cut Hair, the ☾ being in ♐, ♏, ♑, or ♋, increasing in Light. And although this be in the opinion of many but a Trivial thing to observe; yet were it more taken notice of by the Gallants of our times, they need not disguise themselves with Venus Locks; But they, it may be, esteem it an Honour to be made amends with a part of her, that Originally injured them.

Medicina a medico; medela ab altissimo.

An

# TRIGGE 1685.

Upon Tuesday, March the 18. Day, at 7th. *am*,  
1684. viz. the last year were seen three Sun's,  
viz. two *Parelia* or Mock-Suns, besides the true one.  
They were observed, as I have it from a very Learned  
hand, about the South-Sands Head, and in the follow-  
ing figure,

There is much discourse among Learned Philoso-  
phers and Naturalists about the cause or Original of  
thes: *Parely* or Mock Suns, some are of opinion they  
are caus'd by the true Suns shining thorow subtil, moist  
and Diaphanous Clouds, below the Sun, on each-side  
of him, that like Glasses, receive his Image, which  
they thus differently reflect upon us, to our no little  
wonder.

Others are of Opinion, that these Apparitions are  
caused by Spirits or Angels. Mr. *W. Lilly*, in *Starry  
Messenger*, p. 11. saith, — 'I am of Opinion, these  
'lights as well as many others, were caused by these  
'Tutelar Angels, who by Gods permission and un-  
'der him, have the Government of this Nation. The

G

excellent

excellent Author of *Rel. Med. Seft.* 3.1 tells us, that these Noble Essences in Heaven, bear a Friendly regard to their Fellow Natures here on Earth, and that such like Prodigies are the Charitable Premonitions of good Angels, which more careless Enquiries turn but the effects of Chance and Nature.

*Dr. Fulke*, that Learned Meteorologist, sayes, that these *Pseudo*, or Mock-Suns, are nothing else, but Idols, or Images of the true Sun, represented in an equal, smooth and watery Cloud, placed on the side of the Sun, sometimes on both sides of him, into which the Sun-Beams being received, as in a Glass, express the likeness of Fashion and Light that is in the Sun, appearing as though there were many Suns, whereas indeed there is but one, and all the rest are Images.

This smooth and waterish Cloud is not said to be under the Sun; For then it would make the Circles call'd Crownes or Garlands, (for such Images also do sometimes appear in the Heavens.) nor is it opposite to the Sun, for then it would make the Rainbow. But it is said to be on the side where the Image may be best represented. Also, it may not be too far off, for then the Beams will be too Feeble to be reflected; Neither yet too near, for if it be so, the Sun will disperse it: but in a Competent and middle distance. For so a representation of many Suns is caused.

They are most often seen in the Morning, (as this you see was) and Evening; About the rising or going down of the Sun: Seldom at Noon time, or in the midst of the day, because the heat will soon dissolve

dissolve them. Yet have there been some seen, which began in the Morning, and continued all the day long unto the Evening. Sometimes (again) there appear many little Suns, like unto little Stars; which are caused after the same sort, as we do see a Mans Face to be expressed in a broken Looking-Glass. So when the Cloud hath many seperations, there appear many Suns on one-side of the true Sun; sometimes great, and sometimes little, as the parts of the Cloud seperated are in quantity.

These Apparitions of *Parely*, do naturally betoken Tempests, and Rain to follow, because they cannot appear but in a watery disposition of the Air. And if they appear on the South-side of the Sun, they signifie greater Tempest then if they appear'd on the Northside. The reason whereof is this, because the Southern Vapour is sooner resolved into water, then the Northern.

For a supernatural signification (for, they have been Noted to be fore-runners of strange Events) they have been observ'd to have portended Wars, contentions of Princes, Emperours and Nations, &c. As not long before the great struggling and contending interests of *Galba*, *Otho*, and *Vitellius*, for the Empire of *Rome*; There appeared three Suns. And of latter years, a little before the slaughter of *Lewis* King of *Hungary*, were seen three Suns; which betokened the three Princes, which contended for that Kingdom. Namely, *Ferdinando*, since Emperour of *Germany*; *John Vayvode*; And the Grand *Seignior*. I could multiply instances of this Nature, but these shall suffice at this time.

# TRIGGE 1685

Let us now consider the Constitutions of the four Seasons of the year. First of the Spring, which begins when the Sun enters *Aries*: A Figure whereof follows

Cardinal Signes are on all the Angles of this Solar ingress, and therefore will this year be most Eminent for Action, and promoting of great and Notable affairs: And signifies something of a Stupendious nature to happen therein. It is much the same Vernal Equinoctial Figure, as that of the year, 1669. which so happily made way for his most excellent Majesties happy Restauration, and Establishment of Church and State, after many years disorder and confusion, which the late Rebellion had made.

*And*

And, as we have been of late years, by accursed Hellish Plots, and wicked devices, brought into confusion and disorder again, so I hope, nay, have a Confidence, that this year will restore all things to the Honour of his Majesty, and the Glory and Peace of the Church and Kingdom once again; And make us to remember that we are Men and Christians; And, as Subject to one God, so also to Our Sovereign Prince, whom God in his Mercy ever preserve from his Enemies.

I am the more inclined to expect some Transcendent happiness in this year to attend both Prince and People, because the good Planet Jupiter, who is Lord of the empy by exaltation is happily placed in the Ascendant in a kind and Amicable reception of Venus Lady thereof, which as it Astrologically signifies the Mercy, Grace, Favour, and Benignity of Kings, Princes and Magistrates to their People; So it also imports the good use that People will make of such Indulgence and Kindness shown them; And in a just Gratitude return all Duty and Obedience both to the Person and Laws of their Sovereign. And this is a Harmony to be Coveted.

True it is, the fiery Planet Mars is in Square of Venus, and Saturn is in opposition of her. but that injures People by Riotous courses, and Debauchery; but hath nothing to do with affairs of a publick Nature, The worst thing we have to fear of any mischief arising from unquiet spirits, in respect of the Government, is the Moon in an hostile opposition of the Sun, but that aspect is separated, & therefore the less able to do any injury, Howbeit, because it is yet within Orbs, it may intimate a few discontented, and desperate Fool-Hardy-Spirits, who retain somewhat of the old Leaven in them, hard to be forgotten: who perhaps may be apt to Murmure at the growing Felicitie of this (once) Glorious Kingdom, which they have with might and Main endeavoured to disturb and prevent. But let them have a care. The most merciful Prince in the world, if he find his Favours abused, can easily tell how to be Just, and Dormit aliquando Etc. Meritur Nunquam.

*Secondly, of the Summer or Aestival Quarter.*

*Solstitium Aestivum*, or the Summer Quarter, always begins where the Spring ends; The Royal Phœbus then mounting his Apogæon Chair of Honour, is removed to his greatest distance from the Earth, making to us in these Northern Countreys

Countreys largest portion of Sun-shine and the least quantity of Shadow. Or, which is all one, the longest days and shortest Nights to us on this side the Equator.

This comfortable and glorious Season beginneth this year in the Meridian of London (Englands stately Metropolis) on the Eleventh day of June, about Eleven a Clock *Post Meridie*; the Sun then just entring into *Cancer*: And it continueth all that time he passeth the Sign, *Cancer, Leo, Virgo*, if you would know the true Philosophical and Cabalistical significations of all the Four seasons of the year; Read my *Calendarium Astrologicum*, 1681. where you have them fully explained.

### Thirdly, of the Autumnal Quarter.

*Aequinoctium Autumnale*, or the Autumnal Quarter, is the third part of the Astrological Year, and is the Declining Equinox, as the Vernal or Spring is the Inclining One: These being always in opposition each to other, like Aesops Buckets, as the one Mounes, the other goes down proportionably.

The Dayes and Nights are now again equal all the World over, and the Sun doth with a Synonymous respect irradiate both the Poles, as he did in the beginning of the Spring.

Now, this Season always begins where the Summer Quarter ends. viz. When the Sun toucheth the first Scruple of the sign of Justice, or the Cælestial Libra, and continueth all the time he is Transiting through the signs of Libra, Scorpio and Sagitary. And in this Year the Sun toucheth the first point of Libra, on September the 12th. day, two Houres afternoon, Mars rising with the Horoscope, and the Moon in the 7th An.le. I have not room to insert any large Judgements hereon. I will therefore descend unto —

### Fourthly, the Brumal or Winter Quarter.

The Winter quarter constantly begins where the Autumnal ends, and, as all Astrologers agree, ever initiates when the Sun salutes the first scruple of Capricorn, the Earth being then farthest distanced from the Suns Perpendicular Rayes, receiving greatest portion of the Shadow, and the least quantity of sunshine, or of the Solar Glories; and so causes the shortest Days and longest Nights to all those that dwell or inhabit on this side the Equator.

Bright Sol is now in his Perigæon Posture, or in his nearest distance to the Earth, being in exact opposition to the place of his Apogæon

## TRIGGE 1685.

Season, which is Cancer, or the Summer Solstice, always in Diameter to the Winter.

This Year of 1685 this Melancholy and darksome Season begins in December the 14th. day, about half an hour past two in the Morning, the Sun and Saturn being at that time in an unhappy quadrate, darkning not only the Air, but clouding the Understanding of Men too in this quarter. Thus much for the several Ingresses.

### Of the Luminarian Eclipses, 1685.

Here will be in this year three Eclipses, one of the Sun, and two of the Moon

The first Eclipse will be of the Moon, on June the 9th. day, about our Six a Clock Post Meridiem, or Afternoon, in 26 degrees of Sagittary. It will be invisible to us in England, by reason of the Moons being beneath the Eastern Horizon, at the time wherein it happens,

The Second Eclipse will be of the Sun, on June the 21th. day, at Six a Clock at Night, in Ten degrees of Cancer, but will scarcely be visible to us, because the Sun is then just setting, besides it will be but a Small Eclipse.

The Third will be a great Eclipse of the Moon, on November the 30th. day, at ten Hours, Forty five Minutes Afternoon, viz. near 11 a Clock at Night. It will be a visible, Total, and almost Central Eclipse, and admirably well worth the Industrious Astronomers Observation. It is Celebrated in Nineteen degrees of Gemini, or the Twins. And thus much for the Eclipses this year. And also for an End to my Calendarium Astrologicum for 1685.
